

Profix CAR Powder Dyestuff Stock Unit

ENMOS Profix CAR+ is a dyestuff weighing can be done sensitively and safely. System take dyestuff and weighing information from your recipe software or this information can be input in the Profix CAR+'s existing recipe software and records all the weighing transactions and prepare reports when it is requested. Also it guides the operator with warnings on the screen to prevent complications. You can rest assured that your dyestuff is used efficiently thanks to the reports based on the recipe, and the job order.

Profix Car has designed to store powder dyestuff boxes in enough area, providing the fast and easy withdrawal of products for the weighing. The store is modular in design and available in various models, with different structural dimensions and configurations and different numbers of shelves according to available space and dyestuff quantity. With data transferred from the recipe software, it directs you to the right type of dyestuff and Led light marks the dyestuff box and correct amounts to be weighed. Two scales connected to the system ensure correct results. It can be combined with trolley scale platform to move easily along the shelves.
